Work Experience

Science Applications International Corporation
Systems Engineer, 2017 – Present

Responsible for the day-to-day production of over 300 engineers and designers working in the fields of communications, artificial intelligence/machine learning, computer science and automation.

- Routinely uses Adobe tool suite to develop highly custom briefings and graphics distilling complex ideas down to component parts for key decision makers.

- Produced booklets and other printed materials for distribution among stakeholders and investors.

- Produced campaign documentation and other marketing materials used to develop capability investment.

Preting
Consultant, 2015 – 2016

Routinely advised company leadership on the market space and business growth opportunities inside the defense sector.

- Used Adobe tool suite to produce business proposals with associated graphics and other visuals supporting acquisition development.

Raytheon
Consultant, 2014 – 2015

Developed course curriculum for use by the United States Army during major training events.

- Utilized Adobe tool suite to develop content for several professional courses for the United States Army Reserve.

- Supported the business development team in producing targeted project proposals for new sectors of business.
